as a long haul driver i use the xm traffic and weather channels to plan my trips and routes. this would not be possible with am or fm because they dont have a large enough coverage area. i am often 2 or 3 states away when planning routes or avoiding bad weather if i waited til i had an am/fm signal it would be to late to take different route.PLEASE REJECT nab's petition 04-160 this is nothing more than an attempt to do thru regulation what they cant do thru competition.
